Dear Sir or Madam,

As a convinced European when it comes to art and culture, I would like to introduce you to my social sculpture **La maison du dragon**. It is a multifunctional, omni potential, integrative and participatory project. It combines all forms of art (craft, technology, performance, organization) realized as a mobile electronic puppet theatre.

As part of your guidelines, I have run the online application and store all documents available online at any time here:

<https://www.petry.eu/la-maison-du-dragon/>

I say thank you on behalf of the people who will take part in this project and who will enjoy it, for the opportunity to realize this project with their support and to make it available to a broad public.

Sincerely  
Juan Petry
